BRITISH CHEMICAL ENGINEERING

INDEX TO VOLUME 10: JANUARY—DECEMBER 1965

SUBJECT

A

Absorption. Statistical geometry in * D.2
Simultaneous * of two gases ... D.78
Measurement of absorbed gases in chemical engineering research, by A. A. Kilner 537
Acetylene. Burner-reactor for * production D.292
Adsorption of gas phase iodine on dry ion exchange resins, by A. R. Giona 82
Getting the best from adsorbers D.440
Help in adsorber design ... D.818
Agglomeration. Calculating the capacity of agglomerating equipment, by Gh. Macevei 232
Air lift system and damper aid diaphragm pump P.190
Compressed * cylinder acts as booster P.190
* pollution abatement and greater capacity from contact acid plants ... D.224
* operated three way valves give safe control of cooling water ... P.341
Aluminium. New standard for * pressure vessels D.518
Heat transfer through * reflective insulation, by D. S. Davis N.265
Ammonia synthesis continues to advance D.4
Fluid bed ammoniation of superphosphate, by J. Trojan, and V. Vanecek 756
Aromatics. Recovery of * at a naphtha cracking plant, by K. W. Worral, and J. M. Thwaites ... 158

B

Bearing. Fluorocarbon * pads for heavy process equipment P.264
A simple long-life footstep* ... P.486
Benzene. New * -CCl_4 data for testing fractionating columns, by C. O. Haughton 237
Boilers. Waste heat * for the chemical and metallurgical industries, by E. Seher 314
Boiling. Generalized design of evaporators: heat transfer to nucleate * liquids, by J. Starczewski ... 523
Focus on * heat transfer D.666
A correlation for nucleate * ... D.668
Solid additives increase critical heat flux D.668
A new and simple concept for the analysis of non-linear heat transfer phenomena such as * , by E. F. Adiutori 840
Nomogram for * point of NaOH solution by G. E. Mapstone ... N.853
Booster. Jet * for town's gas ... F.769
Boron. An historical note, * and the engineer D.294
Bunker. Improving * behaviour ... D.518

C

Carbon Tetrachloride. New benzene— * data for testing fractionating columns, by C. O. Haughton ... 237

Catalyst. Scale up towards better * utilization in hydrotreatment ... D.672
Chemical Technology. The philosophy of chemical engineering and the case for * , by N. Macleod ... 397
The importance of academic * in industry, by N. Macleod 628
Chimneys. New constructional materials aid design of taller * ... F.182
Chloride. Rotating disc contactor in plastic solves * removal problem ... F.161
Chlorine. Developments in * manufacture D.147
Chlorination of ilmenite in fluidized beds, by I. B. Ketteridge ... 452
Classifiers. Separation mechanisms in dilute pulp hydrocyclone classifiers, by J. Mizrahi 686
Clathration. Separating aromatic hydrocarbons by * , by P. W. Sherwood 382
New desalination process based on * D.748
Closure. A novel money saving* ... D.666
Coal. The future of * in organic synthesis in W. Europe, by E. M. Cairney 540
Coalescence. Spotlight on * ... D.439
Compressibilities. Sulphur dioxide * at low pressures, by A. M. P. Tans N.19
Compressors. A review of * and their applications, by J. O. S. Macdonald, Part I 778
Part 2 854
Advances in Urea facilitated by centrifugal * D.824
Computer Calculation. Computers not required D.665
Computers for analysis and design D.822
Analogue-orientated digital techniques and profitability search ... D.820
Calculation methods for distillation columns developed D.822
Computer Control. How and where to apply direct digital control F.46
Computers hit the headlines ... D.150
Experiences of on-line control come to light D.152
More on ICI's DDC D.152
New research efforts will point way to computer control of chemical processes F.257
On-line process computing, by A. Henney. Part I 599
Part 2 696
Computer control of papermaking D.670
On-line computer applications increase D.820
Advice on models for computers D.822
Computer Simulation. Simulation of a chemical reactor on an analogue computer, by K. Østergaard ... 449
Simulation and optimization of chemical reactors, by G. K. Boreskov, and M. G. Slin'ko 170
The use of simulation for sizing equipment to meet variable demand by B. D. Dagnall 760
Computer simulation of an operating chemical plant 770
Cooling. New ideas for reactors ... D.74
* by air and sea D.148
Air cooled heat exchangers ... D.817
Condensation. Dropwise * in the news D.596
More light on dropwise * ... D.596
* rates improved by porous surfaces and multigraving D.666
More light on dropwise * ... D.670
Towards an understanding of dropwise * D.672
Interest in dropwise * continues D.744
Noble metals show unexpected promise as promoters D.744
* coefficient calculation simplified D.818
Condensers. Pressure drop in* ... D.665
Kern's horizontal condenser theory in the light of published literature and experiment, by J. C. Dent 753
Conductivity. Thermal * of hydrocarbon gases, by D. S. Davis ... N.723
Containers. New uses of intermediate bulk * F.759
Contactor. Rotating disc * in plastic solves chloride removal problem F.161
Control. What lies ahead in process * D.72
Critical path method gives better project control, by J. M. Carson 248
Latest * panel shows progress in instrumentation F.318
Day to day * coordination and * improved for process equipment P.570
Automatically controlled filtration of fertilizer liquors F.607
Another worthwhile venture in * D.590
Silicone insulation aids process * in ethylene manufacture P.853
Conveyors. Tackling the blocked chute problem in automatic * ... P.852
Corona discharge for chemical reactions' see **Plasma** D.514
Corrosion. Prevention of.
A titanium-clad paddle agitator for severe conditions D.49
Preventing gravity flow of a corrosive fluid P.416
Reinforced plastics in chemical plant F.531
Sour gas test station will throw new light on hydrogen enbrittlement F.614
Towards new types of graphite for nuclear reactors F.619
All-fluorocarbon tubular heat exchanger D.672

* Replaces the indexed word

KEY TO REFERENCE LETTERS PRECEDING PAGE NUMBERS:

D = Digest item F = Short feature E = Editorial L = Letter N = Nomogram P = Process Engineer's Notebook

Long life plastic for oleum pump P. 723
Materials for jet ejectors handling corrosive vapours P.791
Critical Path Scheduling.
Sensitivity analysis D.294
Progress with PERT D.594
Critical path method gives better project control, by J. M. Carson ... 248
Critical Properties. Estimation of viscosities of gases from * , by D. G. Gregg and D. B. Purchas N.850

D

Densities. Reduced * of gases at low pressures, by D. S. Davis ... N.194
Desalination. The conventional and unconventional in * D.148
Small scale * plants D.746
Optimum size for dual purpose plants D.748
DESIGN METHODS: articles concerned with.
Homogenization of miscible liquids, Part I, by R. M. Voncken ... 12
Part 2 179
Drying of solids, a refresher, by F. A. Holland 24
Heat exchanger design programme for optimization studies, by D. W. Kirkley, and I. N. Momtchiloff 31
Fundamentals of mass transfer in liquid-liquid extraction by L. E. Johns, R. B. Beckmann and W. B. Ellis 86
Design of bubble-cap distillation plates, Part 2. Plate efficiencies, by H. E. Eduljee 103
Part 3; A worked example ... 162
Part 4; The performance diagram 251
A simple method of evaluating rate constant and order of reaction for irreversible reactions, by H. W. Kropholler, D. Spikins and T. Wildman 109
Rapid calculations for heat sterilizations, by J. W. Richards ... 166
Simulation and optimization of chemical reactors, by G. K. Boreskov, and M. G. Slin'ko ... 170
Calculating properties of multicomponent mixtures, by G. Aüslander L.196
Calculating the capacity of agglomerating equipment, by Gh. Macevei 232
Particle size distribution time relationships in comminution, by N. Arbiter, and C. C. Harris ... 240
Calculating the numbers of trays in binary distillation by S. Bakowski F.256
Mathematical model of a multicomponent distillation, by D. Gelbin 301
Studies of a batch operated solvent extraction process by G. V. Jeffreys and V. G. Jenson 304
Transient behaviour of an equilibrium still, by S. N. Balasubramanian, and G. Narsimhan 310
Better heat exchanger design by W. Bergwerk 323
Optimum design of sieve trays, by I. J. Harris 377
Separating aromatic hydrocarbons by clathration, by P. Sherwood ... 382
Short circuiting in chemical reactors, by I. W. Hennel 385
Separation of azeotropic components by sweep distillation, by M. Subramanian, R. Kumar and R. L. Datta 394
Application of similitude integrals to chemical processes, by A. M. Fainyil'ber and N. A. Fridlander 462
Generalized design of evaporators; Heat transfer to nucleate boiling liquids, by J. Starczewski ... 523
Theoretical analysis of agitation in a multistage fluid bed reactor, by J. Valčhar 532
Efficiency and design of liquid-gas ejectors, by J. H. Witte 602
A general relation for scaling up granulating pans, by Gh. Macevei ... 610
Process development—accident or design, by W. T. Cuthbert (Optimization procedure) 675
Kern's horizontal condenser theory in the light of published literature and experiment by J. C. Dent 753
Heat transfer tables for time variable boundary temperatures in a slab, by T. J. Mirsepassi 764
Desulphurization. Vapour phase * in reforming process D.822
Diffusion coefficient of dilute solutions, by J. Aron N.342
Diffusivity in the liquid phase, by A. W. Nienow 827
Discs. Tips for installing rupture * P.191
Distillation
Design of bubble cap distillation plates:
Part 2—Plate efficiencies, by H. E. Eduljee 103
Part 3—A worked example ... 162
Part 4—Performance diagram ... 251
Flooding in distillation columns overcome P.110
Plate efficiencies and low pressure loss devices D.147
New Benzene-CCl_4 data for testing fractionating columns, by C. O. Haughton 237
Calculating the number of trays in binary distillation, by S. Bakowski ... F.256
Mathematical model of a multicomponent distillation, by D. Gelbin
Transient behaviour of an equilibrium still, by S. N. Balasubramanian and G. Narsimhan 310
Quick determination of the heat balance on a distillation column ... P.341
Optimum design of sieve trays, by I. J. Harris 377
Separation of azeotropic components by sweep distillation, by M. Subramanian, R. Kumar and R. L. Datta 394
Which column for separating heat sensitive materials? D.367
A new flooding correlation for packed towers D.370
Automatic control of distillation columns, by H. W. Kropholler, and D. J. Spikins 544
Tray efficiency concept revised ... D.665
Grid plates with overflow weirs, by J. Majewski 693
Mass transfer in perforated trays, by Z. Sterbaček 772
Rotating bubble caps for fluctuating loads D.750
Calculation methods for distillation columns developed D.822
Drying of solids: a refresher, by F. A. Holland 24
A new type of drier D.78
* in theory and practice D.154
Breaker mechanism solves drier problem D.487
Dyestuff. Technology for * manufacture upgraded D.374

E

Effluents. Fume removal and treatment for a refining process ... F.174
Settling tank extends dephenolizer operation P.190
Air pollution abatement and greater capacity from contact acid plants D.224
Progress in treating gaseous effluents D.444
Progress in solid waste disposal ... D.446
Ejectors for mass transfer D.368
Efficiency and design of gas-liquid * , by J. H. Witte 602
Electrochromatography shows promise D.74
Electrolytic. Trends in * hydrogen plant F.236
Enthalpy—concentration diagram for ethanol-ethyl acetate mixtures 703
Ethylene. A development in * technology D.150
Silicone insulation aids process control in * manufacture P.853
Evaporation. Percentage of flash steam recoverable from a continuous blowdown system, by G. E. Mapstone N.110
A review of evaporators and their applications, by G. Caruana ... 466
Kestner's Centenery D.442
An evaporator novelty D.442
Generalized design of * : Heat transfer to nucleate boiling liquids, by J. Starczewski 523
Prospects for multistage flash evaporation D.748
The double-fluted tube for economic evaporation D.817
Extractive evaporation arrives ... D.820
Exergy loss in heat exchangers ... D.224
Extraction
Industrial equipment for liquid-liquid * , by C. Hanson 34
Fundamentals of mass transfer in liquid-liquid * , by L. E. Johns, R. B. Beckman and W. B. Ellis 86
Improved solid liquid * (leaching) D.74
Studies of a batch operated solvent * process by G. V. Jeffreys, and V. G. Jenson 304
Interfacial resistance to mass transfer in liquid-liquid systems, by A. H. Brown 622
Critical packing size for liquid-liquid contact, by S. R. Sastri ... N.642
Extractive evaporation arrives ... D.820

F

Fertilizers from natural gas in the Netherlands F.313
Automatically controlled filtration of * liquors F.607
New * process employs gas—solid contacting D.668
Hydrochloric acid in phosphoric acid manufacture D.668
Spray process for N-P product shows promise D.670
Wet phosphoric acid filtration rates improved D.670
Fluid bed ammoniation of superphosphate, by J. Trojan, and V. Vaneček 756
Phosphate substitution in phosphoric acid manufacture, by S. E. Dahlgren 776
Filtration. Vibrations speed up * ... D.2
Improved cartridge filter technique P.417
Automatically controlled * of fertilizer liquors F.607
From steam engines to * plant; engineering firm's century of progress F.777
Fire wall barriers isolate danger areas P.111
Fixed Fluidized Beds. Light on multilayer and * D.71
* and axial mixing D.222
Flanges. Cold formed * offer pipework economies D.589
Flooding in distillation columns overcome P.110

A new correlation for packed towers D.370
More light on * rates D.372
Flowmeter. A simple variable area * P.790
Rotameter flow correction factors by nomogram, by G. E. Mapstone ... N.794
Fluid Mechanics. Some recent hydrodynamic studies, by A. Linford 19
Pipeline transport of viscous oils D.1
Pipelines for Non-Newtonian Fluids and weirs for viscous fluids ... D.1
Heat transfer to Newtonian and Non-Newtonian fluids in agitated vessels D.228
Zero force liquid bridges between spherical particles, by G. Mason, and W. Clark 327
Gauges for viscous liquids made from standard glass fittings ... P.340
Viscosities of some organic solvents, by R. Thangappan N.488
Shock waves for commercial exploitation D.514
Flow of saturated steam in pipes, by D. S. Davis N.720
Pipeline transport methods advance D.746
Resistance coefficients for increasers and diffusers, by D. S. Davis N.790
Estimation of viscosity of gases from critical properties, by D. G. Gregg, and D. B. Purchas N.850
Flow straightener P.852
Fluidization. Progress in * , by J. S. M. Botterill 26
High temperature technology based on fluid beds D.71
Extending the upper temperature limit (in the above) D.72
Solids circulation rates in gas fluidized beds, by R. Thangappan Nadar N.120
* attacked on many fronts ... D.221
Flow in fluid beds and bubble behaviour D.221
Heat transfer benefits from obstacles in fluidized beds D.222
Chlorination of ilmenite in fluidized beds, by I. B. Ketteridge ... 452
Distributor caps for fluidized beds P.486
Theoretical analysis of agitation in a multistage fluid bed reactor, by J. Valčhar 532
Studies on the gaseous * of solids, by G. N. Bhat, and E. Weingaertner
Part IV—Effect of temperature on fluidized beds 458
Part V—Wall to bed heat transfer characteristics 615
Fluid bed technique for scale prevention D.592
Fluidizer for fine particles ... P.722
Fluid bed ammoniation of superphosphate by J. Trojan, and V. Vaneček 756
Fuel Cell. Portable * unit produces power from methanol and air ... F.102
Fume removal and treatment for a refining process F.174
Furnace. Research * will yield data on heat transfer from flames ... F.390

G

Gas. New UK refinery uses molecular sieves for LPG purification ... F.23
Natural * comes to Britain ... F.38
Reduced densities of gases at low pressures, by D. S. Davis N.194
Maintenance on * lines with safety P.264
Constant pressure * generator ... P.416
New Ocean terminal for LPG at Immingham F.457
Progress in treating gaseous effluents D.444
Pilot plant and laboratory gas holder P.487
Thermal conductivity of hydrocarbon gases, by D. S. Davis ... N.723
Jet booster for town's * ... F.796
Vapour phase desulphurization in reforming process (town's gas) ... D.822
Estimation of viscosities of gases from critical properties, by D. G. Gregg and D. B. Purchas N.850
Gauges for viscous liquids made from standard glass fittings ... P.340
Geometry. Statistical * in adsorption D.2
Glands. Sleeve valves provide trouble free * P.265
Glassware. High skill in manufacture of industrial * F.33
Glucose. Reduction of * to sorbitol: an explanation, by M. A. Phillips L.196
Granulation its place in chemical engineering, by G. Rettig ... 608
A general relationship for scaling up * pans, by Gh. Macevei ... 610
* by layering in new fertilizer process D.590
Graphite. Towards new types of * for nuclear reactors 632
Grid Plates with overflow weirs, by J. Majewski 693
Grover Tube, The.... ... ... D.594

H

Heat Exchangers. * design programme for optimization studies, by D. W. Kirkley, and I. N. Momtchiloff 31
Heating high viscosity oils by natural convection with small plain and finned tubes * , by J. F. T. Maclaren 176
Exergy loss in * D.224
New * designs scarce D.226
Better * design, by W. Bergwerk 323
Shell and tube exchangers—baffles and bolts D.298
Novelties in heat transfer hardware D.522
Some novel applications of electric surface heaters F.539
Choosing a constructional material for shell and tube * P.571
The Spiralator for better heat transfer D.596
All fluorocarbon tubular * ... D.672
Tips for * design P.791
Air cooled * D.817
Heat Transfer in tube nests ... D.818
Heat Transfer to suspensions ... D.4
Drifting instability in two phase heat transfer systems D.6
Rapid calculations for heat sterilization, by J. W. Richards 166
Cooling by air and sea D.198
Inside * coefficients of coils ... D.152
A generalized expression for predicting latent heat of vaporization of liquids, by G. Narsimhan ... 253
* to Newtonian and non-Newtonian fluids in agitated vessels ... D.228
* through aluminium reflective insulation, by D. S. Davis N.265
Direct contact liquid-liquid heat exchange, by C. Hanson, and J. Ingham 391
Which column for separating heat sensitive materials D.367
Research furnace will yield data on from flames F.390
* to nucleate boiling liquids, by J. Starczewski 523
Focus on boiling * D.666
* for time variable boundary conditions in a slab, by T. J. Mirsepassi 764
A new and simple concept for the analysis of non-linear * phenomena such as boiling, by E. F. Adiutori ... 840
More standardization needed in * problems F.845
* to molten polymers D.818
* from plasma D.818
Homogenization of miscible liquids, by R. M. Voncken, Part I ... 12
Part 2 179
Hydrocarbons. Thermal conductivity of hydrocarbon gases, by D. S. Davis N.723
Hydrotreatment. Scale-up towards better catalyst utilization by * D.672

I

Ilmenite. Chlorination of * in fluidized beds, by I. B. Ketteridge ... 452
Instrumentation. Trouble shooting in * D.516
Insulation. Heat transfer through aluminium reflective * , by D. S. Davis N.265
Integrals. Application of similitude * to chemical processes, by A. M. Fainzil'ber, and N. A. Fridlender ... 462
Ion Exchange. Adsorption of gas phase iodine on dry * resins, by A. R. Giona 82

K

Kinetics. See **Mass Transfer, Reactor Kinetics**

L

Lasers, initiate polymerization ... D.292
Latent Heat. A generalized expression for predicting * of vaporization of liquids, by G. Narsimhan ... 253
Leading Articles. The changing scene 10
Preserve the language 81
The changing pattern 157
A fitting tribute 231
Level switch/alarm P.265
Liquid-Liquid Extraction. See **Extraction**
Loading. Automatic bulk D.6

M

Maintenance. Tips for installing rupture discs P.191
* on gas lines with safety ... P.264
* in spite of production D.296
Trouble shooting in three phase motor circuits P.570
Tackling the blocked chute problem in automatic conveyors ... P.852
Mass Transfer and packing surfaces D.2
Fundaments of * in liquid-liquid extraction, by L. E. Johns, R. B. Beckman and W. B. Ellis 86
A rotating disc contactor for improved chemical reactions and * operations D.76
Rotating disc contactor solves chloride removal problem F.161
Calculation of * coefficients, by J. Bandrowski, and K. Koziol ... L.268
The problem of calculating * processes D.367
Ejectors for * D.368
Interfacial resistance to * in liquid-liquid systems, by A. H. Brown 622
* devices compared 665
* in perforated trays, by Z. Sterbaček 772
Materials Technology. New constructional materials aid design of taller chimneys F.182
Exacting requirements for electronic materials bring changes in processing techniques F.239
Fluorocarbon bearing pads for heavy process equipment P.264

New standard for pressure vessels helps U.K. exporters F.385
Mixed reception for higher strength stainless D.444
New standard for aluminium pressure vessels D.518
Reinforced plastics for chemical plant F.531
Choosing a constructional material for shell-and-tube heat exchangers... P.571
Sour gas test station will throw new light on hydrogen embrittlement F.614
Towards new types of graphite for nuclear reactors 632
Cold formed flanges offer pipework economies D.589
All fluorocarbon tubular heat exchanger D.672
Membranes. Membrane separation processes to the fore D.368
Mist. Tackling the * problem ... D.226
Mixing. Homogenization of miscible liquids, by R. M. Voncken: Part 1 ... 12
Part 2 179
Portable * unit has retractable propeller shaft P.48
A titanium clad paddle agitator for severe conditions P.49
Heavy duty mixer transforms processes D.374
Molecular Sieves. New U.K. refinery uses * for LPG purification F.23
* gain ground for refinery separations F.85
Moss. Irish sea * as gathered and dried in Maine, by D. S. Davis ... 175

N

Naphtha. Recovery of aromatics at a * cracking plant, by K. W. Worral, and J. M. Thwaites 158
Natural Gas comes to Britain ... F.38
Fertilizers from * in the Netherlands F.313
New ocean terminal for LPG at Immingham F.457

O

Olefins. The production of light * from cracker gas, by P. L. Charlesworth 834
Optimization. Heat exchanger design programme for * studies, by D. W. Kirkley, and I. N. Momtchiloff 31
Simulation and * of chemical reactors, by G. K. Boreskov, and M. G. Slin'ko 170
Optimum design of sieve trays, by I. J. Harris 377
Variational methods paramount... D.440
Process development—accident or design, by W. T. Cuthbert ... 675
Optimum temperature conditions for programmed gas reactors, by B. A. Hills 680
Chemical plant productivity improved by work study D.744
Organics. Trends in organic manufacture D.513
Oxidation processes upgraded ... D.513

P

Papermaking. Separation mechanisms in dilute pulp hydrocyclone classifiers, by J. Mizrahi 686
Improvements in paper machine control 707
Computer control of * D.670
Petroleum. Calculating specific heats of * oils, by D. S. Davis ... N.49
* and mineral based chemical industries develop side by side in Poland F.108
Dutch * industry keeps pace with Europe F.551
Phosphorus. Unusual sampling technique for molten * P.48
Phosphoric Acid. Hydrochloric acid in * manufacture D.668
Wet process * filtration rates improved D.670
Pipes and Pipelines. Pipeline transport of viscous oils D.1
Pipelines for non-Newtonian fluids and weirs for viscous fluids ... D.1
Cold formed flanges offer pipework economies D.589
Flow of saturated steam in pipes, by D. S. Davis N.720
Pipeline transport methods advance D.746
Plasma. The * field broadens ... D.743
* prospects D.743
* avoids scale-up problems ... D.743
Heat transfer from * D.818
Plastics. Reinforced * for chemical plant F.531

Pneumatic Discharge tanker solves bulk sugar handling problem
Polymers. Lasers initiate polymerization D.818
Polymer addition for scale prevention D.818
Heat transfer to molten polymers D.818
Precipitator. A continuous * ... P.417
Pressure Drop in condensers ... D.665
Flow of saturated steam in pipes, by D. S. Davis N.720
Pressure Vessels. New standard * helps U.K. Exporters F.385
New standard for aluminium* ... D.518
Process Control. See **Computer Control, Control** and **Optimization**
Pthalic Anhydride from o-xylene in the U.K. D.4
Publishers. Link up of major technical * announced F.461
Pumps. Air lift system and damper aid diaphragm pump P.190
Metering * for chemical and process duties, by A. V. London ... 400
More on metering * D.590
Long life plastic for oleum pump P.723
See also **Compressors.**

R

Radioactivity. Measurement and control of gas temperature in the Fingal process, by M. N. Elliot, and J. R. Grover 846
Reactor Kinetics and Design. (see also **Computers, Control** and **Fluidization**).
Reaction Kinetics and reactor design, by S. P. Mukherjee, and L. K. Doraiswamy 93
A simple method of evaluating rate constant and order of reaction for irreversible reactions, by H. W. Kropholler, D. J. Spikins and T. Wildman 109
New ideas for reactors (cooling) D.74
A rotating disc for improved chemical reactions and transfer operations D.76
The raining bed reactor ... D.76
Reaction kinetics advances steadily D.291
Estimating reactor performance for commercial reactions D.291
Towards more accurate reactor design D.292
Laboratory unit for reaction kinetics including a sampling device P.340
Short circuiting in tubular chemical reactors, by W. Hennel ... 386
Reactor activity continues ... D.372
Light on the recirculation reactor D.372
New technology for old processes D.372
Application of similitude integrals to chemical processes, by A. M. Fainzil'ber, and N. A. Fridlender ... 462
New reaction techniques advance D.513
Scale up toward better catalyst utilization in hydrotreatment ... D.672
Spargers in reactor system ... D.824
Reactions. Phthalic anhydride from o-xylene in the U.K. D.4
Recovery of aromatics at a napthta cracking plant, by K. W. Worral, and J. M. Thwaites 158
Developments in chlorine manufacture D.147
A development in ethylene technology D.150
Reduction of glucose to sorbitol, an explanation, by M. A. Phillip ... L.196
Burner reactor for acetylene production D.292
Continuous processing methods applied to formalin production ... F.309
Chlorination of ilmenite in fluidized beds, by I. B. Ketteridge ... 452
Manufacture of toxaphene, by M. A. Philips 550
Hydrochloric acid in phosphoric acid manufacture D.668
Fluid bed ammoniation of superphosphate, by J. Trojan, and V. Vaneček 756
Phosphate manufacture substitution in phosphoric acid manufacture, by S. E. Dahlgren 776
A new process for urea synthesis D.744
The production of light olefines from cracker gas, by P. L. Charlesworth 834
Vapour phase desulphurization in reforming process D.822
Rebuilding a company D.374
Research. Take over of sponsored * laboratories will widen scope ... F.247
Resistance Coefficients for increasers and diffusers, by D. S. Davis N.790
Rotameter flow corrections factors by nomogram, by G. E. Mapstone ... N.794

S

Safety. Fire wall barriers isolate danger areas P.111
Blanking process lines for * ... P.111
Maintenance on gas lines with * ... P.264
Level switch—alarm P.265
Air operated three-way valve gives safe control of cooling water ... P.341
Isolating hazardous areas of a plant P.853
Scale. Fluid bed techniques for * prevention D.592
The * problem D.592
Polymer addition for * prevention D.818
Settling Tank extends dephenolizer operation P.190
Shock Waves for commercial exploitation D.514
Silicone insulation aid process control in ethylene manufacture ... P.853
Similitude. Application of * integrals to chemical processes, by A. M. Fainzil'ber, and N. A. Fridlender ... 462
Spargers in reactor systems ... D.824
Specific Heats. Calculating * of petroleum oils, by D. S. Davis ... N.49
Spiralator for better heat transfer D.596
Spray process for N-P product shows promise D.670
Steam. Percentage flash * recoverable from a continuous blowdown system, by G. E. Mapstone N.110
Waste heat boilers for the chemical and metallurgical industries, by E. Seher 314
Flow of saturated * in pipes, by D. S. Davis N.720
Sterilization. Rapid calculations for heat * , by J. W. Richards ... 166

Surfactant. Spent acid eliminated in * manufacture D.440
Sugar. Pneumatic discharge tanker solves bulk * handling problem ... F.543
Sulphur Dioxide compressibilities at low pressures, by A. M. P. Tans ... N.191
Superphosphate. Fluid bed ammoniation of * , by J. Trojan, and V. Vaneček 756

T

Thermal Conductivity of hydrocarbon gases, by D.S. Davis ... N.723
Thermocouples. Comparative measurement adaptations for different * P.111
Thermodynamics. New jargon or clarification in * D.222
Chart for Van Laar equations, by P. D. Terry 684
Enthalpy—concentration diagram for ethanol-ethyl acetate mixtures, by M. M. Krishnaiah, M. U. Pai and S. R. Sastri 703
T.N.T. Continuous production of *; New process developed in Norway D.8
Toxaphene. The manufacture of *, by M. A. Phillips 550

U

Urea. A new process for * synthesis D.744

V

Valves. Sleeve * provide trouble free glands P.265
Sleeve * solve grit arrestor problem P.722
Location of * in methane treatment plant P.724
Van Laar equations. Chart for *, by P. D. Terry 684
Vapour Pressure. Read * of water from a standard slide rule P.417
Variational methods paramount D.440
Vibrations speed up filtrations D.2
Viscosity. Gauges for viscous liquids made from standard glass fittings ... P.340
Viscosities of some organic solvents, by R. Thangappan N.488
Estimation of * of gases from critical properties, by D. G. Gregg, and D. B. Purchas N.850
Vortex Tube. A cycle based upon the * D.296

W

Wetting agents tackle many problems D.439

X

o-xylene. Phthalic anhydride from * in the U.K. D.4

BOOK REVIEWS

Fundamentals of Cost Control in the Chemical Industry, by H. Carl Bauman 50
Modern Power Station Practice, Volume IV, CEGB 50
Modern Power Station Practice, Volume V, CEGB 122
Principles of Comminution, by B. Beke 122
Automatic Control Activities of the European Federation of Chemical Engineering, 1. Annual Report, 2. Process Optimization in the Chemical Industries (in German) ... 122
Kings' Manual of Gas Manufacture, Section B, Removal of Hydrogen Sulphide and Organic Sulphur from Gas, J. J. Priestley 198
Chemistry for Engineers, An Introductory Course, 2nd Edn. 1964, by E. Cartnell 198
Process Control by P. Harriot ... 266
A short Russian Dictionary of Terminology Used in Soviet Rubber, Plastics and Tyre Industries, by M. Lambert 266
The Halogenated Hydrocarbons of Industrial and Toxocological Importance, by W. F. von Oettingen ... 266
High Polymers—Vol. XVIII—Copolymerization, G. E. Ham (Ed.) ... 344
Acetylene; Its Properties, Manufacture and Uses, Volume I, S. A. Miller 344
Handbook of Applied Instrumentation, D. M. Considine (Ed.) S. D. Ross (Assoc. Ed.) 418
Friedel-Crafts and Related Reactions Volume II, Alkylation and Related Reactions, G. A. Olah (Ed.) ... 418
The Collision Theory of Chemical Reactions in Liquids, by A. M. North 490
Continuous Measurement of Unsteady Flow, by C. P. Kays ... 490
Kirk-Othmer Encyclopaedia of Chemical Technology, 2nd Edition, Volumes II and III 490
Advances in the Kinetics of Homogenous Gas Reactions, by Z. G. Szabo 490
Equilibrium Thermodynamics, by J. Coull and E. B. Stewart 644
Technology and Uses of Liquid Hydrogen, by R. B. Scott, H. Denton and C. M. Nicholls 644
British Instrument Directory and Data Handbook 1965 644
Oil and Colour Chemists' Association Paint Technology Manuals, Part 4, The Application of Surface Coatings, C. J. S. Taylor, and S. Marks (Eds.) ... 796
Alkylation with Olefins, by A. V. Topchiev, S. V. Zavgorodnii and V. G. Kryuchkova 796
Chemical Engineering Professional Engineers Examination, by G. Coven 796
Clean Air Year Book, 1965-66 ... 796
Technique of Organic Chemistry, Volume IV, Distillation, E. S. Perry and A. Weissberger (Eds.) ... 796
lectures on Gas Chromatography, L964, Agricultural and Biological Applications, L. R. Mattick, and H. A. Szymanski (Eds.) 796

INDEX OF AUTHORS

Aduitori, E. F., A new and simple method for the analysis of non-linear heat transfer phenomena such as boiling 840
Arbiter, N., and Harris, C. C., Particle size distribution/time relationships in comminution ... 240
Aron, J., Diffusion coefficient of dilute solutions N.342
Ausländer, G., Calculating properties of multi-component mixtures ... L.196
Bakowski, S., Calculating the number of trays in binary distillation ... 256
Balasubramanian, S. N., and Narsimhan, G., Transient behaviour of an equilibrium still 310
Bandrowski, J., and Koziol, K., Calculation of mass transfer coefficients L.268
Beckmann, R. B., Johns, L. E., and Ellis, W. B., Fundamentals of mass transfer in liquid-liquid extraction 86
Bergwerk, W., Better heat exchanger design 323
Bhat, G. N., and Weingaertner, E., Studies on the gaseous fluidization of solids, Part IV, Effect of temperature on fluidized beds 458
Idem; Part V, Wall to bed heat transfer characteristics 615
Boreskov, G. K., and Slin'ko, M. G., Simulation and optimization of chemical reactors 170
Botterill, J. S. M., Progress in fluidization... 26
Cairney, E. M., The Future of coal in organic synthesis in W. Europe ... 540
Carson, J. M., Critical path method gives better project control ... 248
Caruana, G., A review of evaporators and their applications 466
Charlesworth, P. L., The production of light olefines from cracker gas ... 834
Clark, W., and Mason, G., Zero force liquid bridges between spherical particles 327
Cuthbert, W. T., Process development—accident or design 675
Dagnall, B. D., The use of simulation or sizing equipment to meet varying demand 760
Dahlgren, S. E., Phosphate substitution in phosphoric acid manufacture 766
Datta, R. L., Subramanian, M., and Kumar, R., Separation of azeotropic components by sweep distillation ... 394
Davis, D. S., Calculating specific heats of petroleum oils N.49
Idem; Irish sea moss as gathered and dried in Maine 175
Idem; Reduced densities of gases at low pressures N.194
Idem; Heat transfer through aluminium reflective insulation ... N.265
Idem; Flow of saturated steam in pipes N.720
Idem; Thermal conductivity of hydrocarbon gases N.723
Idem; Resistance coefficient for increasers and diffusers N.790
Dent, J. C., Kern's horizontal condenser theory in the light of published literature and experiment 753
Doraiswamy, L. K. and Mukherjee, S. P., Reaction Kinetics and reactor design 93
Eduljee, H. E., Design of bubble cap plates; Part 2—Plate efficiencies ... 103
Part 3—A worked example 216
Part 4—The performance diagram 251
Elliot, M. N., and Grover, J. R., Measurement and control of gas temperature in the Fingal process 846
Ellis, W. B., Johns, L. E., and Beckmann, R. B., Fundamentals of mass transfer in liquid-liquid extraction 86
Fainzil'ber, A. M., and Fridlander, N. A., Application of similitude integrals to chemical processes ... 462
Gelbin, D., Mathematical model of a multicomponent distillation ... 301
Giona, A. R., Adsorption of gas-phase iodine on dry ion exchange resins 82
Gregg, D. G., and Purchas, D. B., Estimation of the viscosity of gases from critical properties N.850
Grover, J. R., and Elliot, M. N., Measurement and control of gas temperature in the Fingal process ... 846
Hanson, C., Industrial equipment for liquid-liquid extraction ... 34
Idem; and J. Ingham, Direct contact liquid-liquid heat exchange 391
Harris, C. C., and Arbiter, N., Particle size distribution—time relationships in comminution ... 240
Haughton, C. D., New benzene-CCl_4 data for testing fractionating columns 237
Hennel, W., Short circuiting in tubular chemical reactors ... 386
Henney, A., On-line process computing Part 1 599
Part 2 696
Hills, B. A., Optimum temperature

conditions for programmed gas reactors 680
Holland, F. A., Drying of solids: a refresher 24

CONFERENCE REVIEWS

American Water Pollution Control Federation, 37th Annual Meeting, Bal Harbour, Florida, Sept. 27-Oct. 1, (1964), continued at San Juan, Puerto Rico, Oct.4-7, (1964) ... 42
Computer Conference, Dallas, Texas, National Petroleum Refiners Association, Oct. 13-15 (1964) ... 112
Conference on packaging and materials handling, Harrogate, Association of British Chemical Manufacturers, 2-5 Nov. (1964) ... 116
Battle of Processes—alternative routes to phenol, N.W. Branch, Institution of Chemical Engineers, Nov. 12 (1964) 118
188
Third European Symposium on Chemical Reactor Engineering, Amsterdam, Sept. 15-17(1964) ... 184
Annual Meeting of the American Institute of Chemical Engineers, Boston, Mass., 6-10 Dec. (1964) ... 258
Symposium on Ethylene Processes, N.W. Branch, Institution of Chemical Engineers, Manchester, 15 Dec. (1964) 336
Rotary Compressors in Chemical Processes, Joint Meeting of the N.W. Branches of the Institutions of Chemical and Mechanical Engineers, Jan. 12 (1965) 338
Symposium on Fluidization, Joint Meeting of the N.W. Branch of the Institution of Chemical Engineers and the Chemical Engineering Group of the Society of Chemical Industry, Manchester, Mar. 23-24 (1965) 412
Recent Developments in Two Phase Flow, N.W. Branch Institution of Chemical Engineers, Manchester, Feb. 16 (1965) 414
55th National Meeting of the American Institute of Chemical Engineers, Houston, Texas 7-11 Feb. (1965) 478
562
Conference of the Chemical Engineering Section of the E. German Chemical Society, Magdeburg 16-18 Mar. (1965) 568
35th International Congress of Industrial Chemistry, Warsaw, Sept. 15-19 (1964) 634
710
784
Symposium on water and air cooling services, N.W. Branch, Institution of Chemical Engineers, Manchester, April 13 (1965) 788
Symposium on Two Phase Flow, Exeter, June 21-23 (1965) 862
Symposium on Boiling Heat Transfer, Institution of Mechanical Engineers, 15-16 Sept. (1965) 868

EXHIBITIONS

Progress in Fertilizer Technology Demonstrated at U.S. Research Centre, by C. J. Pratt 319
Salon de la Chimie, C.N.I.T., Paris, 21 April-2 May 1965 553
Processing hardware at Hanover fair 619
Particle size reduction machinery at Hanover F.701
Chemical plant section expanded at Utrecht exhibition F.679
British display at Moscow spearheads new assault on Soviet chemical and Chemical Engineering market ... F.695
Trade Brisk at Moscow Exhibition F.755
